**On May 1, 2010** – TechServ Inc. reactivated its marketing and business development services business after 4 years being solely dedicated to Agility Defense & Government Services, Inc. Agility’s downsizing in the U.S., after running afoul of the Justice Department and being suspended from Government contracting, was a key factor in TechServ’s decision to reactivate independently. Said TechServ’s President Carl Selfe, “We regret Agility’s misfortune in its contract dispute with the Defense Department. Agility gave us all the tools we requested and the freedom we needed to test and prove our theories of higher end graphics design and integrated, collaborative processes in Government sector proposal development. We achieved a 60% win record and booked \$10.9 billion for Agility in 4 years. With Agility’s trust in us, we rewrote the BD book. We wish Agility luck going forward, and a speedy resolution to the dispute.”
